- MongoDB
- HTML/CSS/Vanilla Javascript
- Git
- Postgres
- Sequelize
- ReactJS
- Automation with Puppeteer
- Web Scraping with cheerio
- Typescript
- MySQL

PROJECTS

HOSPITAL PATIENT DATABASE MANAGEMENT SYSTEM

A website for carrying out CRUD operations on patient data by hospital staff. Contains JWT authentication to prevent unauthorized access by non-staff.

Built with HTML, CSS, Javascript, NodeJS and MongoDB.

<https://regeneration-clinics-dbms.herokuapp.com/login>

PORTFOLIO WEBSITE

A portfolio website built with HTML, CSS, Javascript, NodeJS and MongoDB. Projects on the website are not hardwired and can be updated without writing any additional code. I also included JWT authentication to prevent visitors to the site from being able to edit and change projects.
